Recent Experience, Responsibilities and Achievements

Full Stack Developer – Dasset, Auckland

2020 - current

Dasset is a New Zealand-based cryptocurrency exchange that allows users to buy and trade between NZD and over 100 digital assets, such as Bitcoin and Ethereum.

- Designed, developed and maintained multi-browser compatible components
- Built scalable APIs using AWS Lambda, Cognito, DynamoDB and API Gateway to fetch user and crypto exchange details; secured APIs through authorization.
- API Integration with SaaS solutions with service and data integration
- Worked in Agile methodology by managing a team in Scrum calls, planning, and sprint retrospective meetings.

Achievements

- Working closely with the team that resulted in a 70% increase in new users and the weekly transaction volume is equal to the monthly transaction volume in the same period last year
- Developed all features for NFT and Web3 project.

Full Stack Developer – Sphere Identity, Auckland

2019 - 2020

Sphere Identity is a blockchain-based global identity provider for customer, guest and employee onboarding. Built on the principles of Privacy-by-Design, the innovative SaaS solutions make the digital landscape simpler and safer.

- Responsible for making reliable and practical sprint plans, managing the scrum process with the coordination of a scrum team in Agile methodology.
- Arranged daily stand-up meetings, sprint planning meetings, sprint demo and retrospective meetings in order to ensure quick inspection and proper use of adaptation process.
- Successfully developed all features for web-based Sphere Platform, such as sign-in and signup flow with passwordless authentication and Multi-factor Authentication, dashboard and settings. Used ReactJS, React Hooks, Node.js, Jest, JSON, HTML/CSS/JavaScript.
- Collaborated extensively with team members to develop Restful APIs using AWS Lambda, Mongoose, Serverless and API Gateway.

Full Stack Developer - Zambion, Hamilton

2016 - 2019

Zambion develops and deploys web-based Payroll, HR, Time and Attendance, Leave Management Software. The business has been in NZ for 10+ years and is a leading Payroll systems provider with clients.

- Made a significant contribution to the development of a state-of-the-art advanced web-based Payroll, HR, Time and Attendance, Leave Management Software that is IRD compliant, intuitive, intelligent
- Successful in programme multiple features to meet client needs such as Payslips, Leave Balances, Position Management, Performance/Review Management, Payments/Deductions
- Developed new features such as Company Organisation Chart, Dynamic Forms, Dynamic dashboard widget, and Training System

Achievements

- Highly effective in collaborating with team members to the cloud project that resulted in a 300% increase in sales both locally and abroad growing the company from 12 to around 60 clients
- After independently refactoring and upgrading over 80% of the front-end code, this cloud project was well improved and sold for over \$10 millions

Full Stack Developer - Central Station Software, Auckland	2015 - 2016
--	--------------------

Central Station Software develops and deploys software using the latest design techniques, technology and device application. The business caters for the early childhood education sector and others creating custom design system solutions specific to business needs.

Achievements

- Successful in contributing to both back-end and front-end development of features for the Contact Manager that managed more than 110,000 contact details in the AIMY Plus system
- Led the optimising of legacy code and reduced redundant data to decrease response time from 8 seconds to 0.5 seconds in average

Full Stack Developer - Tang Ren Ltd, Auckland	2014 - 2015
--	--------------------

Tang Ren Ltd is software development and web design company that delivers web system development, website building, website promotion, planning and running of the spatial domains as well as network marketing, visual identity design and web media promotions.

- Responsible for leading the team from a technical perspective including technical decision making, sprint planning, daily stand up, demo and retrospective meetings.
- Managed Multiple project development as a team lead to operate with internal and external customers to capture requirements and translate to user stories, and understand how solutions are architected and integrated internally and with external third party software.
